Ampip Engineering operates in the mechanical engineering field related to high quality precision engineering, fabrication and gear cutting. The context of the business is to comply with all aspects and the needs and expectations of all role players that Ampip is associated with in business. The purpose of Ampip is servicing the interested parties -internal and external ,taking into consideration compliance and striving to supply only the best quality product and service.

As top Management, we therefore totally commit to: -

- ☞ Identify with our client's current and future needs, by providing a product & service that meets the customer requirements with an aim of exceeding customer expectations in relation to the products in this field of operation.
- ☞ Adopt business strategies to facilitate assurance that quality objectives is in line with the strategic business direction.
- ☞ Comply with all related **statutory** and regulatory requirements.
- ☞ To create and maintain the internal environment in which people can become fully involved in achieving the company's planned objectives and targets
- ☞ To create, maintain and control operational processes by ensuring that resources and activities are effectively managed to achieve the desired result.
- ☞ To continually improve the effectiveness and efficiency through measurement and evaluation
- ☞ Analyse systems and procedures to ensure that factual and effective decisions are made
- ☞ Conduct business with our clients in a manner that is mutually beneficial and which enhances the ability of both of us to create value
- ☞ Embrace the risk policy to safeguard our business from potential harm.
- ☞ Promote the process based approach to enhance performance management.

Our internal measurement processes covers all aspects of our business and ensures that objectives defined complies with our strategic direction within the context of the business.

We further commit ourselves to the implementation and maintenance of a Quality Management System complying to ISO 9001:2015, and to the continual improvement of our business by the regular review of our Quality Management System and keeping abreast with the latest technology in our field.
